Dear County Representatives,

Thank you for taking my call last week. As discussed, the Nevada Department of Taxation is preparing to implement a new electronic submission requirement for taxpayers, tax preparers, and other tax professionals submitting documents to the Department, effective December 7, 2026.

As part of this transition, we recognize that not all taxpayers have access to a computer, reliable internet service, or the technology necessary to complete their electronic filings. We want to ensure that this new requirement does not create an unnecessary hardship for individuals and businesses who may lack these resources.

To help address this concern, the Department would like to explore a partnership with Nevada's counties to establish designated electronic filing kiosks in county libraries.

These kiosks would provide members of the public with access to a computer and internet connection so they can access the Department's online portal and submit required tax documents electronically. This would be particularly beneficial to taxpayers who do not have access to the necessary technology or internet service at home or at their place of business.

We would appreciate the opportunity to discuss the possibility of:

- Designating space within county libraries for an electronic filing kiosk.
- Providing public access to a computer and internet connection for taxpayers using the Department's online portal. The connection would need to be hardwired or provided through a secure Wi-Fi network.
- Having the Department cover the costs associated with establishing and maintaining the kiosk.
- Exploring whether library staff could provide basic accessibility assistance, such as helping patrons access and use the kiosk. This would not include IT support, tax preparation, or tax advice. The Department will provide a dedicated phone number for taxpayers who need assistance navigating the Department's online system or have questions regarding tax-related matters.

The Department believes this partnership would help promote equitable access to electronic filing, support small businesses and individual taxpayers, and reduce barriers to compliance with the new electronic submission requirement.

We understand that each county has its own facility and resource considerations, and we would welcome the opportunity to discuss a solution that works for your community.

At this time, we are simply asking whether your county would be interested in exploring this partnership. Attached is a picture of the proposed kiosk, along with its specifications. Once we have confirmed participation from interested counties, we anticipate beginning implementation of the kiosks in January 2027. We will then coordinate with participating counties to establish a schedule and discuss the next steps for installation.

Please let us know if your county would be willing to explore this partnership and who would be the appropriate contact to coordinate next steps.

Thank you for your consideration and for your continued commitment to serving Nevada residents and businesses.

Sincerely,

Sarah Glazner
